Professional profile

Full-stack developer with 4 years of experience in backend (PHP, Laravel, Blade) and frontend (React, JavaScript). Passionate about building robust and secure solutions, integrating cybersecurity principles from the development phase (DevSecOps mindset).

I recently completed the **Cisco Cybersecurity Essentials program**, strengthening my knowledge in network security fundamentals, basic traffic analysis with Wireshark, and Linux-based lab simulations.

My hybrid background in development, automation, and cybersecurity fundamentals allows me to understand and anticipate vulnerabilities across applications and systems. I am currently seeking opportunities to contribute to teams focused on security, quality, and continuous improvement.

Professional experience

Full-Stack Developer — Soundlutions

January, 2021 – Present

- Developed backend applications using PHP (Laravel, Blade) and REST APIs.
- Built frontend interfaces in React and JavaScript, prioritizing usability and security.
- Integrated external services securely and implemented authentication mechanisms.
- Automated tasks and maintenance processes using basic Bash scripting.
- Supported basic configuration and maintenance of Linux servers (Ubuntu Server).

- Reviewed and applied secure coding practices throughout the development lifecycle.
-

Cybersecurity training and certifications

- Cisco Networking Academy: Cybersecurity Essentials
 - Cisco Networking Academy: Introduction to Cybersecurity
 - Cisco Networking Academy: Networking Basics
 - Cisco Networking Academy: Networking Devices and Initial Configuration
 - Cisco Networking Academy: Endpoint Security
 - Cisco Networking Academy: Network Defense
 - Cisco Networking Academy: Cyber Threat Management
-

Technical skills

- **Backend:** PHP (Laravel, Blade), REST APIs.
 - **Frontend:** React, JavaScript.
 - **Scripting & automation:** Basic Bash scripting.
 - **Operating systems:** Linux (Ubuntu Server, Kali Linux — basic/intermediate), Windows, MacOS (user level).
 - **Cybersecurity:** Network security fundamentals, basic traffic analysis (Wireshark), segmentation, secure configurations.
-

Relevant projects

- Implementation of secure authentication and advanced input validation in Laravel applications.
 - Network simulation labs in Packet Tracer during Cisco courses.
 - Basic traffic analysis and reporting in Linux lab environments.
-

Languages

- Spanish: Native
 - English: Upper-intermediate (B2–C1)
-

Additional information

- Security-oriented mindset and focus on continuous improvement.
- Active interest in DevSecOps and integrating security into all stages of development.
- Participation in tech and cybersecurity communities.
